# SalesAlert<sup>™</sup> drives performance

A six-month analytical lift study

We set out to prove that regular usage of SalesAlert™ boosts dealer sales performance.

## **Our Study**

### **Sample Size**

Dealers activated prior to October 2024

# **Measurement Timeframe**

6 months post-activation

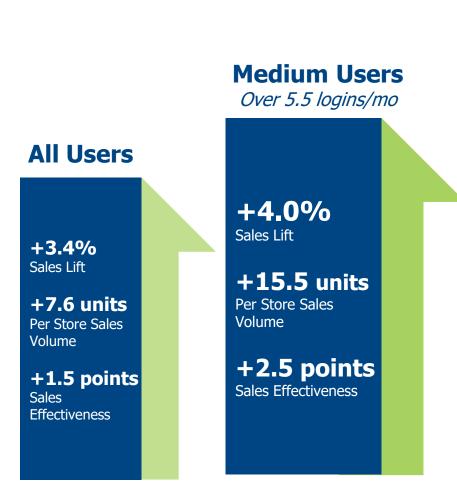

#### **Control Groups**

Created from similarlysized dealers.

#### **Usage Segments**

Dealer groups segmented by frequency of use.

## The results? All user segments sold more vehicles

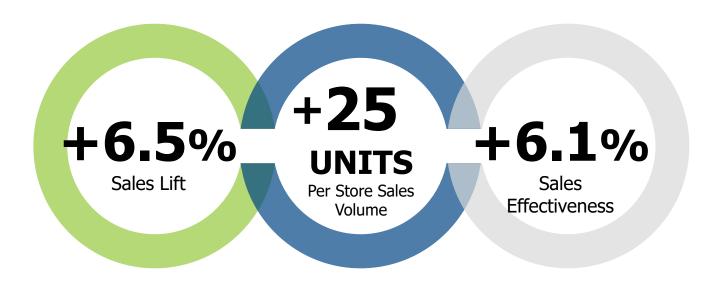

# Real-time changes. Real-time wins.

SalesAlert makes every day count -Quick logins help dealers prioritize daily follow-up and enables real-time coaching that improves efficiency, lowers costs, and creates measurable long-term impact.

# Consistency changes everything

Highly engaged dealers (over 13 logins/mo) supercharge their sales

## Best practices

Check SalesAlert<sup>™</sup> daily to know when leads defect:

- Stop chasing dead leads and focus on in-market shoppers.
- Train sales staff with defection insights to turn yesterday's losses into today's wins.
- Incorporate defection data into marketing strategies.
